We use a Julian date code system, 5 digit number. On the bottles for example you will see "19241", that means that bottle was ran on the 241<sup>st</sup> day of 2019.

On the carton we will put a number like this, N199 x05 19241.

N199 is the formula number, x05 means that is our 5<sup>th</sup> batch of that product this year and then followed by the Julian date code.
