

# Electric Sprayer System

ProKure®

Item #PK-5GSAINTG-EA

Our mission is to give pros simplicity and versatility when applying ProKure1 liquid. We've found that electric sprayers provide the right volume of ProKure liquid very efficiently—easily cutting application time in half! The Electric Sprayer System is lightweight, powerful and simple to use!

## Set Up Instructions

1. Please read instruction manual prior to using.
2. The sprayer system comes with a ProKure 5-gallon container. Make ProKure1 liquid as directed and ensure batteries are charged for sprayer.
3. Connect Sprayer with clear, long PVC hose using the installed quick connect. Connect the PVC hose to the 5-gallon container using installed quick connect.
4. The sprayer comes with a nozzle kit with 6 spray tips (3 metal & 3 plastic). We have added the green spray tip for misting applications. You can replace the sprayer jets of the angled plastic spray tips by unscrewing them by hand. Replacement spray tips can be found at: [www.sprayerdeport.com](http://www.sprayerdeport.com).
5. We have included additional brass parts to place the quick connect onto the lance. If you have difficulty negotiating the placement of these parts - please watch the instructional video in our Videos tab at: <https://www.prokuresolutions.com/resources/>.
6. When finished using the sprayer, run clean water through the hose and sprayer to flush remaining chemicals. Store sprayer in black hard carry case.
7. Questions concerning maintenance and repair should be sent to: [info@saint-ge.com](mailto:info@saint-ge.com)

# 5-Gallon Container with Quick Connect for Electric Sprayer System

ProKure®

Item #PK-5GCONTQC-EA

**Need an additional container with quick connects to the electric spray system?** No worries, we got that! Simply order #PK-5GCONTQC-EA for your larger jobs to complete a wider range of work, more profitably.

## Making additional draw tubes for other containers

1. Cut 12" of 1/4" Pex tubing<sup>1</sup>
2. Install 3/8' x 1/4" reduction adapter (58559)<sup>2</sup> on Pex tubing<sup>1</sup>
3. Drill 3/16" hole in 5-gallon container collar.
4. Screw 1/4" to 1/4" threaded nipple w/shutoff (64654)<sup>2</sup> into (58559) through the collar hole.
5. Connect to clear, long PVC hose female quick connect. Ready to spray!

*Parts<sup>1</sup> can be found at Home Depot or Lowes, Parts<sup>2</sup> can be found at [www.usplastic.com](http://www.usplastic.com)  
Using a larger container, like a 20 or 55-gallon drum? Call us at 866.206.1301 to learn more.*
